

Customer Support Handbook and FAQ

Pawan Pvt Ltd — Customer Operations

Version 5.0 | Effective 1 February 2025

Table of Contents

1. About This Handbook

This handbook is the reference used by customer support agents at Pawan Pvt Ltd. It records the answers to the questions customers ask most often, together with the internal procedure for each.

Agents should answer from this handbook wherever a question is covered. Questions not covered here are escalated to a team lead rather than answered from personal judgement.

The handbook is updated monthly. Agents are notified of changes through the support team channel.

2. Contacting Support

2.1 Support Channels

Customers can reach support through four channels:

- **Phone** — 1800-XXX-XXXX, 9:00 AM to 7:00 PM, Monday to Saturday.
- **Email** — support@pawanpvtltd.example, monitored during the same hours.
- **Support portal** — support.pawanpvtltd.example, available 24 hours.
- **Dealer** — customers who purchased through a dealer may contact the dealer directly, who raises a ticket on the customer's behalf.

2.2 Response Targets

Channel	First response target	Resolution target
Phone	Immediate	Same call where possible
Email	4 working hours	2 working days
Portal	4 working hours	2 working days
Dealer-raised	8 working hours	3 working days

Tickets classified as Critical — where a customer's production is stopped — carry a first response target of one hour and are escalated to a service engineer immediately.

2.3 Ticket Reference

Every contact generates a ticket reference in the format TKT-YYYY-NNNNNN. Customers should quote this reference in all follow-up contact. Agents should provide it at the start of every interaction.

3. Frequently Asked Questions — Orders

3.1 How do I track my order?

Customers can track an order in the support portal under My Orders, or by quoting the order number to an agent. Tracking becomes available once the order is dispatched and the courier has scanned the consignment, normally within 24 hours of dispatch.

3.2 Why has my order not been dispatched?

The most common causes are: payment not yet cleared, the product being manufactured to order, or an incomplete delivery address. Agents should check the order status field before responding, and give the customer a specific reason and a revised date.

3.3 Can I change my delivery address after ordering?

Address changes are possible before dispatch, subject to the new address being in the same serviceable region. Changes to a different region require the order to be cancelled and re-placed, because pricing and lead time may differ.

After dispatch, the address cannot be changed. The customer may refuse delivery and the order is then handled as a return.

3.4 Can I add an item to an existing order?

No. Items cannot be added to a confirmed order. A separate order must be placed. Where both orders are dispatched from the same location on the same day, shipping is charged once.

3.5 What are the payment options?

Credit card, debit card, UPI, net banking, and NEFT/RTGS bank transfer. Corporate customers with an approved credit account may order against the account, with payment due 30 days from invoice date.

Cash on delivery is not available for any product.

4. Frequently Asked Questions — Delivery

4.1 How long does delivery take?

Delivery time is lead time plus transit time. Lead times are in the product catalogue. Transit time by destination:

- Within Maharashtra: 2 to 3 working days.
- Karnataka, Gujarat, Madhya Pradesh, Telangana: 3 to 5 working days.
- Rest of India excluding North-East: 5 to 8 working days.
- North-Eastern states, Jammu and Kashmir, Andaman and Nicobar: 8 to 14 working days.

4.2 Do you deliver on Sundays?

The courier partner does not deliver on Sundays or national holidays. Delivery attempts are made Monday to Saturday between 9:00 AM and 7:00 PM.

4.3 What happens if I miss the delivery?

The courier makes three delivery attempts on consecutive working days. After the third failed attempt, the consignment returns to the nearest hub and is held for seven days.

The customer may arrange collection from the hub during this period, or request one further delivery attempt at a charge of Rs 350. After seven days, the consignment returns to the company and the order is treated as a return, with return shipping deducted from the refund.

4.4 Is installation included in delivery?

No. Installation is a separate chargeable service. Charges are in the product catalogue. Installation can be booked at the time of order or afterwards through the support portal.

5. Frequently Asked Questions — Returns and Refunds

5.1 What is the return window?

Thirty days from delivery for most products. Customers with an active Annual Maintenance Contract have 45 days. Full details are in the Refund and Returns Policy.

5.2 My product arrived damaged. What do I do?

Report within 48 hours of delivery through the portal or to claims@pawanpvtltd.example, with photographs of the outer packaging, the damaged product, and the shipping label. The customer should keep the original packaging until the claim is closed.

Agents should raise the claim immediately and set the customer's expectation of a three-working-day assessment.

5.3 How long does a refund take?

Refunds are processed within 5 to 7 working days of approval. Time for funds to reach the customer depends on payment method — card refunds take a further 5 to 10 working days, UPI and net banking 2 to 4 working days.

Agents should give both numbers, not only the processing time, because most complaints about refund delays come from quoting only the first.

5.4 Can I return a custom-made product?

Custom-manufactured products cannot be returned under the standard window. They remain covered by warranty if a manufacturing defect is found.

5.5 I have lost my invoice. Can I still return the product?

Yes. Agents can retrieve and re-issue the invoice from the order record using the order number, the registered phone number, or the product serial number.

6. Frequently Asked Questions — Warranty and Service

6.1 What is the warranty period?

Twelve months from delivery for most products. PX series pumps carry 24 months and CP series control panels carry 36 months.

6.2 Does warranty cover installation faults?

No. Damage caused by incorrect installation is excluded, where the installation was not carried out by the company or an authorised partner.

For CP series panels specifically, warranty requires installation by the company or an authorised partner. Self-installed panels remain covered for manufacturing defects only.

6.3 How do I book a service visit?

Through the support portal, by phone, or by email. The customer needs the product serial number and a description of the fault. An engineer contacts the customer within two working days to schedule the visit.

6.4 What does a service visit cost?

Visits under warranty are free of charge. Out-of-warranty visits carry a diagnostic charge of Rs 1,500, which is waived if the customer proceeds with the quoted repair.

Travel charges of Rs 22 per kilometre apply for sites beyond 50 km from the nearest service centre.

6.5 What is an Annual Maintenance Contract?

An AMC provides scheduled preventive maintenance visits, priority response, and an extended return window of 45 days. Two tiers are available:

- **Standard AMC** — two preventive visits per year, 48-hour response target, 10% discount on spare parts.
- **Comprehensive AMC** — four preventive visits per year, 24-hour response target, spare parts included up to Rs 25,000 per year.

AMC pricing is quoted based on the installed equipment list and site location.

7. Escalation Procedure

7.1 When to Escalate

Agents escalate to a team lead when any of the following applies:

- The customer explicitly requests escalation.
- The ticket has been open beyond its resolution target.
- The customer's production is stopped and no engineer has been assigned within two hours.
- The question is not covered in this handbook and has no clear answer.
- The customer alleges a safety issue.

7.2 Safety Issues

Any report of electric shock, fire, smoke, or injury associated with a product is escalated immediately to the team lead and to the Quality Department, regardless of ticket status. Agents must not attempt to diagnose the cause.

The customer is advised to isolate the equipment from supply and stop using it until an engineer has inspected it.

7.3 Escalation Levels

- **Level 1** — Team lead. Reviewed within four working hours.
- **Level 2** — Customer Operations Manager. Reviewed within five working days.
- **Level 3** — Grievance Officer at grievance@pawanpvtltd.example. Responds within 15 working days.

8. Communication Standards

8.1 Tone

Agents write in plain language, avoid technical jargon unless the customer has used it first, and never blame the customer, the courier, or another department in customer-facing communication.

8.2 Committing to Dates

Agents commit only to dates they can verify in a system. Where a date is not yet known, the correct response is to state when the date will be known, rather than estimating.

8.3 Closing a Ticket

A ticket is closed only after the customer has confirmed the issue is resolved, or after three attempts to contact the customer across at least five working days. The closure note records which applies.
