

Refund and Returns Policy

Pawan Pvt Ltd — Customer Operations

Version 2.8 | Effective 1 January 2025

Table of Contents

1. Scope

This policy governs refunds, returns, replacements, and warranty claims for all products sold by Pawan Pvt Ltd through its direct sales channel, authorised dealers, and online storefront.

The policy applies to customers in India. Export orders are governed by the terms in the relevant export contract and are outside the scope of this document.

Nothing in this policy limits the statutory rights of a consumer under the Consumer Protection Act, 2019.

2. Standard Return Window

2.1 General Rule

Customers may return most products within 30 days of the delivery date for a full refund, provided the product is unused, in its original packaging, and accompanied by the original invoice.

The 30-day period is calculated from the date of delivery recorded by the courier, not the date of order or dispatch.

2.2 Extended Window for Annual Contract Customers

Customers holding an active Annual Maintenance Contract (AMC) are entitled to an extended return window of 45 days from the delivery date. The extended window applies automatically and does not require a separate request.

2.3 Products Excluded from Return

The following are not eligible for return under the standard window:

- Custom-manufactured items produced to a customer specification.
- Control panels that have been wired or installed.
- Consumables including lubricants, seals, and filters, once the seal is broken.

- Products sold as clearance stock, marked “final sale” on the invoice.

Excluded products remain covered by the warranty terms in Section 5 if a manufacturing defect is found.

3. Damaged Products

3.1 Damage in Transit

Products that arrive damaged must be reported within 48 hours of delivery. Reports made after 48 hours may be refused, because the courier’s liability window closes at that point.

To report transit damage, the customer submits photographs of the outer packaging, the damaged product, and the shipping label through the support portal at support.pawanpvtltd.example, or by email to claims@pawanpvtltd.example.

The customer should retain the original packaging until the claim is resolved. Disposing of the packaging before assessment may result in the claim being refused.

3.2 Assessment and Outcome

Claims for transit damage are assessed within three working days of receiving complete photographic evidence. The customer is offered one of three outcomes:

- **Replacement** — a new unit dispatched at no charge, normally within five working days.
- **Full refund** — processed to the original payment method.
- **Repair with partial refund** — where the customer prefers to keep the unit, a repair is arranged and a partial refund of up to 25% of the invoice value is issued.

The customer chooses the outcome. Where the customer does not respond within 10 working days of the offer, a replacement is dispatched by default.

3.3 Damage Discovered After Installation

Where damage is discovered only after installation, and the customer can demonstrate that the damage predates installation, the claim is assessed under the warranty procedure in Section 5 rather than as transit damage.

4. Refund Processing

4.1 Timelines

Approved refunds are processed within 5 to 7 working days of the claim being approved. The time taken for funds to appear in the customer’s account depends on the payment method:

- Credit and debit cards: 5 to 10 working days after processing.

- UPI and net banking: 2 to 4 working days after processing.
- Corporate credit accounts: applied to the next monthly statement.
- Cheque or demand draft: dispatched within 10 working days of processing.

4.2 Refund Method

Refunds are issued to the original payment method. Refunds to an alternative account are permitted only where the original account is closed, and require written confirmation from the account holder together with a cancelled cheque.

4.3 Partial Refunds

A partial refund may be issued where a product is returned in a condition that is not resaleable but is not defective — for example, where the original packaging is missing or the product shows minor handling marks. Deductions are:

- Missing or damaged original packaging: 10% of invoice value.
- Missing accessories or documentation: 5% of invoice value per item.
- Visible handling marks not affecting function: up to 15% of invoice value.

Total deductions do not exceed 25% of invoice value. The customer is informed of the deduction before the refund is processed and may elect to have the product returned instead.

4.4 Shipping Charges

Where a return arises from a defect, damage, or an error by the company, original shipping charges are refunded in full and return shipping is arranged at company expense.

Where a return arises from a change of mind, original shipping charges are not refunded and the customer bears the cost of return shipping.

5. Warranty Claims

5.1 Standard Warranty

All products carry a standard manufacturer warranty of 12 months from the date of delivery, covering defects in materials and workmanship.

Selected products carry extended warranty as stated on the invoice — pumps in the PX series carry 24 months, and control panels in the CP series carry 36 months.

5.2 What Warranty Does Not Cover

The warranty does not cover:

- Normal wear of consumable parts including seals, gaskets, and impellers.
- Damage caused by incorrect installation, where installation was not performed by the company or an authorised partner.

- Damage caused by operation outside the published specification, including voltage, temperature, and duty cycle limits.
- Damage caused by unauthorised repair or modification.
- Cosmetic damage that does not affect function.

5.3 Making a Warranty Claim

Warranty claims are submitted through the support portal with the product serial number, a description of the fault, the original invoice, and where relevant, photographs or video of the fault.

An engineer contacts the customer within two working days to arrange either a site visit or a return-to-base repair, depending on the product and the nature of the fault.

5.4 Warranty Outcomes

Where a fault is confirmed as a warranty defect, the company repairs or replaces the product at no charge. The choice between repair and replacement is at the company's discretion, based on the nature of the fault and parts availability.

Where the fault is found to be outside warranty, the customer is provided with a repair quotation before any chargeable work begins. A diagnostic charge of Rs 1,500 applies to out-of-warranty assessments, which is waived if the customer proceeds with the quoted repair.

Repairs carried out under warranty are themselves warranted for 90 days from the date of repair, or for the remainder of the original warranty period, whichever is longer.

6. Order Cancellation

6.1 Before Dispatch

Orders may be cancelled without charge at any time before dispatch. Cancellation requests are submitted through the support portal or by contacting the account manager.

6.2 After Dispatch

Once an order has been dispatched, it cannot be cancelled. The customer may refuse delivery, in which case the order is treated as a return under Section 2, and return shipping charges apply.

6.3 Custom Orders

Custom-manufactured orders may be cancelled without charge within 24 hours of order confirmation. After 24 hours, cancellation charges apply as follows:

- Cancellation before production starts: 10% of order value.
- Cancellation after production starts but before completion: 40% of order value.
- Cancellation after production is complete: no cancellation permitted.

7. Exchanges

7.1 Eligibility

A product may be exchanged for a different model within 30 days of delivery, subject to the same condition requirements as returns in Section 2.

7.2 Price Differences

Where the replacement product is of higher value, the customer pays the difference before dispatch. Where the replacement is of lower value, the difference is refunded under the timelines in Section 4.

7.3 Limit

Each order may be exchanged once. A second exchange request on the same order is treated as a return and refund, and a fresh order must be placed.

8. Escalation

8.1 First Level

Customers dissatisfied with a refund or warranty decision may request escalation to the Customer Operations Manager by replying to the claim reference number. Escalations are reviewed within five working days.

8.2 Second Level

Where the first-level escalation does not resolve the matter, the customer may write to grievance@pawanpvtltd.example. The Grievance Officer responds within 15 working days, as required under the Consumer Protection (E-Commerce) Rules, 2020.

8.3 Records

All claims, decisions, and escalations are recorded against the customer account and are available to the customer on request.
